

Macler\*

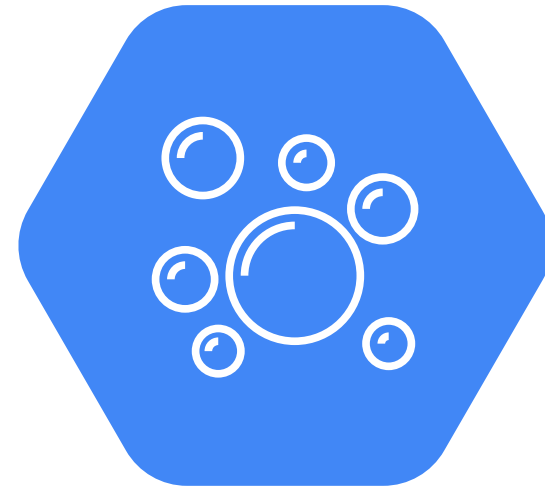

**PRIME**  
Line

# Dissolvine GL-47-S

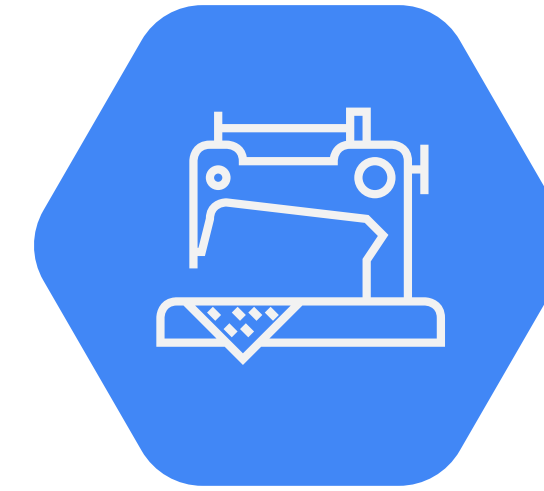

Biodegradable  
Sequestrant

# Application

SANITIZERS

TEXTILE

AGRICULTURAL

COSMETICS

# Benefits

**Green Product:**  
rapidly biodegradable  
and 100% plant-based

**Improves**  
product stability

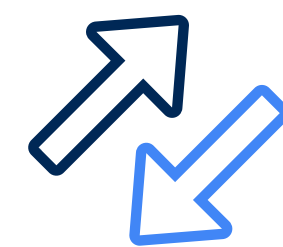

**Low toxicity:**  
safer for handling  
and the ecosystem

**Increased antimicrobial efficacy:**  
effectiveness against molds and  
Gram-negative and Gram-positive  
bacteria, potentially optimizing biocidal  
formulations and reducing costs.

# Benefits

Same performance,  
less environmental impact.

Chelation performance similar to EDTA,  
allowing for a sustainable replacement  
**without loss of efficiency.**

# PRIME

## Line

**Prime** is a line of special molecules that solve a wide spectrum of difficulties for formulators.

The products in this line demand knowledge and previous experience in order to make the development work more efficient and with lower costs.

Most of the time, when specialties are applied without the proper know-how, they become costly, which for us, is nonsense.

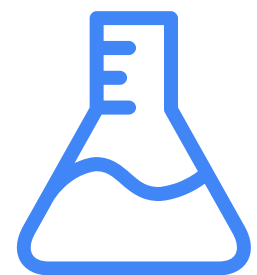

Yes, technology should come in the interest of efficiency, but also of competitiveness and, above all, the generation of increased value.

For this process to be as productive as possible, our Smart**Lab** goes on with technical support directing the formulator and, often, suggesting the development of a new solution internally.

# Macler \* SmartLab

Contact our SmartLab and see how Macler is able to deliver much more than just a sample.

We will take all our laboratory and know-how packed in the shape of a prototype of the product you intend to develop.

Live the experience of having a strategic partner at your service. Count on SmartLab!

**Macler\***

Our chemistry  
in **harmony**  
with your routine.
