

Macler\*

**STANDARD**  
Line

# Dialkyl Chloride 50%

**Cationic surfactant**

Quaternary ammonium

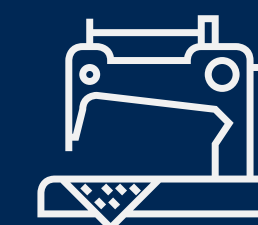

Hygiene  
and cleaning

Cationic active  
for softeners

Textile

Cationic active  
for softeners

Agricultural

Dispersant

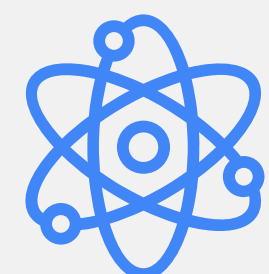

## **Contraindications and situations to avoid**

Incompatible with anionic  
products and sodium

## Physical-chemical specifications

### Parameters

### Dialkyl Chloride 50%

Physical State, 25°C

Liquid

Appearance

Turbid to translucent

Water (%)

6,0 - 8,5

Active (%)

47,5 - 52,0

Gardner Color

0,0 - 2,5

pH, 25°C

5,0 - 6,0

## Homologation

Contact our sales team and request a sample for testing and homologation!

# TrustScan®

All of our Standard products go through **TrustScan!**

A **methodology** that ensures the quality of the product at the time of application. We believe that a product with the **correct concentration** is the minimum we must provide.

**TrustScan** is more than an anti-fraud seal!

Due to the fact that it is one of the most traditional surfactants and has a low price, it is often adopted in cases where its performance does **not present** a cost-benefit ratio. After all, a low price does not always indicate a low cost in the application inside the formula.

To find out if you are using this product in the most cost-effective way and discover other solutions focused on **cost-benefit**, count on our Smart**Lab**!

**SmartLab** is a research and development department entirely dedicated to our active customers.

Live the **experience** of having a **strategic** partner at your service. Count on Smart**Lab**!

Contact our sales team. We will offer all our **know-how** to your product. If you have any questions, please contact our Smart**Lab**.

**Macler\***

Our chemistry  
in **harmony**  
with your routine.
