TrustScan®

All of our Standard products go through **TrustScan!**

A **methodology** that ensures the quality of the product at the time of application. We believe that a product with the **correct concentration** is the minimum we must provide.

TrustScan is more than an anti-fraud seal!

Due to the fact that it is one of the most traditional surfactants and has a low price, it is often adopted in cases where its performance does **not present** a cost-benefit ratio. After all, a low price does not always indicate a low cost in the application inside the formula.

To find out if you are using this product in the most cost-effective way and discover other solutions focused on **cost-benefit**, count on our Smart**Lab**!

SmartLab is a research and development department entirely dedicated to our active customers.

Live the **experience** of having a **strategic** partner at your service. Count on Smart**Lab**!

Contact our sales team. We will offer all our **know-how** to your product. If you have any questions, please contact our Smart**Lab**.

Macler*

Our chemistry
in **harmony**
with your routine.
